Caring for you at Hospice and Home

## Advanced Communication Skills 9am-4pm

Saint Catherine's Education Centre, Throxenby Lane, Scarborough, YO12 5RE

This course is aimed at health professionals who want to improve their management of difficult communication situations.

The majority of the course programme is informed by the delegates' own agenda and these items are then addressed through skills practice scenarios. This safe environment affords practitioners the opportunity to develop specific communication strategies and skills. The course is based on the Maguire method which has been recognised as one of the effective models of skills development by the Cancer Action Team. Although developed in the field of oncology, the training is also applicable for those working with non-cancer patients.
